NATIONAL THEATRE, CHATHAM STREET.-DOORS HRISTY'S OPERA HOUSE, MECHANICS' HALL, NO.

472 Broadway, above Grand street.—Oben every sight
during the week until further notice. The original and well
known Christy's Minterle, comprising an efficient and vereastic "corps" of "talented" and "experienced performers,"
ruder the management of E. P. Christy, whose concerts in
this city, for a succession of "five years," have been received
with favor by highly respectable and fashionable audiences.
Tickots, 25 cents. Doors epen at 6/4, and will commence at
7/4 o'clock. The pattons of Christy's Minsrels are respectfully informed that the Saturday afternoon cencerts are discontinued. An afternoon Cencert on New Year's day, commencing at 3 o'clock.

Parallows: MINSTRELS. -FUN-FUN-FUN-AT FELDiw's Municul Hall, No. 444 Broadway.—Admission, 26
const; children under twelve, 12½ conts. Fellows' Minstrole,
the greatest band of Negro delineators in the world, perform
every nighs. The programme for this evening will content
some of the bast Negro Songs over composed and sung by this
faimitable company; also, R. H. Silter, the truly wonderful
here observed was dancer, will amuse the audience in giving
the very laughable and difficult stope of the Southern and
Wostern captors; the Shakers will be shoot up, as usual, with
somehing new. Performances commence at 7½ o'clock. On
Wednesday and Saturday attornoons, a Concert for the accommodation of families, commencing at 3 P. M.

Fallows' MINSTRELS.—Frank Brower, The great Jester and inimitable Negro delineator, will make his first appearance on Monday evening, Jan 5.

IN AID OF THE KOSSUTH FUND.—ONE OF THE CELchraded Tapestries of Kaphael (the only one of the kind
ever brought to this country), representing Paul and Barnabas at Lystra. will be on exhibition two weeks, at the New
York Society Library, 345 Broadway, the whole proceeds of
which will be paid over to the Trustees of the Kossuth Fund.
The Tapestrie is twonty-two feet long by fourteen teet high,
and in a very good state of preservation, and the colorramarkably bright. Criticisms are invited to the gonulmoness
and beauty of this ancient work of ark. Open from 10 a. M.
to 9 P. M. Admittance 20 cents. No one, we think, can refuse so small a contribution to the good cause.

O RATORY AND POETRY OF THE OLD AND NEW World - Stuyvesant Institute, Friday, Tuesday, and Friday Evening, January 9th, 18th, and 18th, at 7½ olicek. Fowler, a gentleman very highly respected in the capacity he ants, and on snore a friendly hand to all is sharactoristic. We cannot but guarantee success to the captain and enterprise.

ARRIVAL OF THE STEAMSHIP CHEROKEE. Five Days Later from California. TWO MILLIONS IN GOLD DUST. NEWS FROM THE MINES. THE REVOLUTION IN CHILI.

Important from the West Indies.

LOSS OF AMERICAN VESSELS, &c. &c. &c.

The United States mail steamship Cherokee, Captain Windle, arrived yesterday, bringing news from Cali-fornia of a later date by five days than that brought by the Prometheus. The amount of specie on board is two millions of dollars. The Cherokee brings the mails to the fifth of December last.

The Cherokee experienced very severe gales of wind and a heavy head sea for the first five days from Chagres, in consequence of which her passage was very much lengthened. Had she escaped these gales, the passage from San Francisco to New York would have been made

W H Weetfall Our readers can form a pretty correct idea of the extent to which emigrants are still pouring into California. by the following table of the arrivals at and departures from San Francisco :--

Nov. 15 to 20. Nov. 30 to Dec 3 Departed. Arrived, Departed 752 690 236 26 77 8 2 47 7

Northern mines, in Marysville, Nevada, Mokelumne, and Grass Valley. It was supposed they were committed by organized bands, whose object was plunder. One or two murders had also been committed in the Southern mines, it was thought, by the same parties. Yigliance commit-

vads, which is said to be superior to any other. It saves, from the Sink of Humboldt river to Sacramento city, about fifty miles in distance; besides, it crosses the untains at a far less elevation than any other route in that part of the State.

Several projects of railroads are discussed with much interest. One is talked of between Sacramento city and Marysville; another between Sacramento city and Nevada city; and a third between Sacramento city and

wada city; and a third between Sacramento city and Nevada city; and a third between Sacramento city and Auburn. There is also one proposed between Stockton and the Scuthern mining regions. The route for a proposed railroad between San Francisco and San Jose is now being surveyed.

The steamer Golden Gate made the run from San Francisco to Panama in 12 days! The following is her report:—Left San Francisco at 16 o'clock A. M. on the 5th of December, in charge of the great United States mail. December 9, cff Magritta Island, passed steamer Tennessee, for San Francisco. December 12, arrived at Acapulco at twenty minutes past 8 o'clock A. M. Left Acapulco on the 18th, at twenty minutes past 10 o'clock A. M. December 19, at 4 o'clock P. M., passed steamer Northerner, from Panama for San Francisco for Panama on the 1st, and the Independence the same day, for San Juan; the Republic touching at the way ports.

The Golden Gate brought three hundred passengers, and the largest mail that ever left California. She also brought two and a laif millions in treasure. She made a very short passage, having been only twelve days and nineteen hours from port to port, and twelve days and nineteen hours from port to port, and twelve days and nineteen hours from port to port, and twelve days and two hours running time, which is some three days less time than the passage was ever made; and the time from Chagres, fifteen days and twelve hours. She was six days and twenty-two hours from San Francisco to Acapulco, and five days and five hours som Acapulco to Panama, where she arrived on the 18th, at 9 A. M.

The Philadelphia arrived in port as the Cherokes sailed.

The Alabams, from New Orleans, was in port.

Panama, where she arrived on the 18th, at 9 A. M.
The Philadelphia arrived in port as the Cherokes sailed.

The Alabams, from New Orleans, was in port.

The Alabams, from New Orleans, was in the alast four weeks, may be assumed, in the absence of reliable data, at tweaty pur cent less than during the month of October. This decrease is attributable to various causes, but principally to a very general cessation of active operations by the miners, preparatory to going into winter quarters, and to the annual rise in the mouths of August, September and October. These streams usually commence swelling previous to the setting in of the rains and surpend labor in them before there is sufficient water in the higher localities to enshib the miners to commence work in the dry diagrias.

The river beds, which have yielded very largely during the season just closed, are by no means exhausted, even in such places as have been most worked. The works are abandoned, and will be materistly damaged by the winter floods, but not to such an extent as to require a very great outlay in recommencing operations another season. From close observation and experience, acquired by a recidence of nearly two years in the mines, we hasard nothing in expressing the opinion that, by the spency of improved machinery, and the adoption of more afficient modes of working the mines, the annual yield of gold from this source alone, will, in leas than five years, equal the entire product of the present year from all sources. This opinion will be sustained by incot men who are acquainted with the great tichness of nearly all the streams thus far tested, and the comparatively limited excent to which they have been worked. Even the bars, that have been the theater of the meat extensive operations, generally continue to be a rich, app

truth.

Cayote mining, by which the great bulk of treasure has been produced since the close of the last rainy season, will be measurably suspended during the winter months, but only to be recommenced with renewed success in the spring. In the meantime, those who have been engaged in that branch of labor will resort to the challow surface diggings, which promise an abundant yield.

been engaged in that branch of labor will resort to the shallow surface diggings, which promise an abundant yield.

A locality of very considerable extent has been recently discovered in Mariposa county, which, from the accounts received, excels in richness anything yet known in the country. If the stories of this wonderful place he not greatly exaggerated—which we think more than probable—it will itself swell the monthly product of the centry to a figure considerably above that of any month of the past season. Making allowance for exaggeration, we have no doubt but the unusual richness of the point in question—Bear Valley—will make a perceptible increase in the average yield. From other parts of Maripora we have favorable accounts of the general success of the miners in every department of labor.

In the next great mining district Tuolumne county, even in localities that have been incessately worked since 1849 the miners are respling a rich harvest, and in placers more recently opened, the yield is more abundant. In Calaveras, and the counties adjacent on the north, a profitable season is anticipated and miners are colly awaiting the coming of the rains to commence where operations. The whole region of country on the reveral branches of the American and Yuba rivers, in which there is a more dense mining population than in ary other section of the State, promises a prosperous salven, in all the departments of mining labor. Private advices from the Kismath represent the mines in that region as more productive than at any previous period; but owing to the high latitude, and other causes unsfavorable to winter mining, we do not anticipate large recepts from that quarter during the present season.

Experiments in quarter glinding are continued in various parts of the country, on an extensive scale. A very large capital has been invested in machinery, implements so, but, thus far, without any remuserating return. But it is more than probable that most of the experiments thus far made will fail. But a small pertion o

mining.
Aftegather, the prospects from all parts of the State are highly favorable to an unusually successful season in mining, and we predict that the products and shipments of gold during the first six months of 1852 will be larger than during any similar period. We will venture to estimate the amount at \$50,000 000.

State of the Country.

[From the San Francisco City News. Dec. 4.]

Endeual quiet has prevailed in our city during the last fertnight, and their is but little news to report. Private quarrels, however, have been numerous, and their result in one or two instances—cold lead—has endangered the lives of by standers equally with those of the belligerent parties.

A difficulty between W. A. Rhodes and Wm. Mulligan occurred in the Bella Union, a gambling saloon on the plaz, on the evening of Nov. 18th. Revolvers were drawn and discharged—Mulligan firing three shots and Rhodes five. Three balls, from the pistol of the latter, took effect on Mulligan, two logging in his right arm, and the other striking him in the head from whesee it traversed between the roaip and skull, in a singular manner, without inflicting serious damage. A random shot from Mulligan's revolver, struck a by stander, Jno. Otto in the fleshy part of the thigh. Rhodes was not injured. He surrendered himself, and, after an examination before the Recorder, was discharged. Mulligan was arrested, but, before the day set for his examination arrived, he was accidentally shot in one of his legs, on the occasion of an affray between two men named Davis and Crumley, which came off hear the Union Hotel, on the 24th. In this case, Davis was shot in the right shoulder. In consequence of these occurrences, coupled with the very general inclination to pull a revolver on a slight protext, the idea of rendering the carrying of deadly weapons a penal effence has found many advocates, but it is not probable it will extend any further.

A sail boat was capsized in our hashor on Sunday last. It contained five men, of whom three were drowned—Henry Ogden, Frantz Wilson, and Mr. Conslaugh. The two former are said to have been from New York city, the latter was an Englishman. The remaining two, one of whom was C. H. Wethered, saved themselves by clinging to the boat until the arrival of boats from the shore.

Edward Dupugh, a colored man, who arrived here on the cleanership

street., on Monday night last, by stabbing himself in the Dreast; just above the heart.

Mr. Franklin Whitney, lately chosen Chief Engineer of the Fire Department, having resigned, in consequence of ill health, an election to fill the vacancy has been fixed for the 6th inst. The candidates now in the field are Geo. H. Hossefross and T. K. Battelle, Esqrs. Meantime, C. L. Case, Esq., is acting as Chief.

We have been visited by another slight shick of an earthquake, though not so perceptible as the one we mentioned two weeks ago.

In the care of Samuel Gailagher, tried in the District Court for the murder of Lewis Pollock, the jury, after a conference of eighteen hours, found the prisoner guilty of manisaughter. Judge Lake sentenced him to imprisonment for three years, and to pay a fine of \$500. A rumor that Governor McDougal intended to pardon Gallagher prevailed during the last week.

No decision has yet been rendered by the Supreme Court, in the matter of S. R. Harris exec. the City of San Francisco, vs. C. J. Brenham, which involves the right of the present city administration to their seats.

[From the Atta California, Dec. 5, 1851.]

Battle At Pony Oncome with street of the maniling and the seat of the content of the present city administration to their seats.

right of the present city administration to turn seats.

[From the Alta Chilfornia, Dec. 5, 1851.]

Battle at Post Osconn.—It is reported that a military express has arrived at the head-quarters of General Hitchcock, from Port Orford, bringing news of a fight between the detachment of U. S. troops recently sent against the hostile indians in that region, and a party of, the latter. About fifteen Indians are said to have been killed.

the latter. About officen Indians are said to have been killed.

The Coast Survey.—The United States surveying propeller Quickstep, Captain Alden, U. S. N., commanding, returned to our port at an early hour last weening. She has been as far south as the dividing line between Mexico and the United States, and has accurately determined the position of the various islands, rocks, shoels, &c., &c., which interfere with the navigation of the coast. The results of the survey, we understand, will be speedily given to the public in a new and correct chart. The weather has been extremely favorable for the prosecution of the work in which the party on board the Quickstep was engaged, and the knowledge of the coast which has been obtained is of a most important and reliable character.

Thours—Gov. McDougal is now in town. He informs us that having officially received information from the lower country relative to the state of the indian difficulties, he sent word last night to Gen. Hitchock, who is at Sonoma, of the strait in which the citizens of San Diego and Les Angeles are placed, requesting him to despatch troops forthwith to the rescue, if possible. He also informs us that if a detachment does not arrive to day, volunteers will immediately be called for.—Blac California, Dec. 5.

The Case of Carr. Waterman—Capt Waterman, who surrendered himself, a few days since to the United States anthorities, and who was to have been examined yesterday, waived as examination, and was committed trial upon the charges against him. He was committed trial upon the charges against him. He was committed trial upon the charges against him. He was committed upon four different warrants—three for assault, and one for murder—San Francisco Herald, Dec. 5.

On board steamship California. S. D. Corwin, of Jersey City, at sea, at 7 P. M., November 28, leaving a wife at Jersey City, buried at San Diego.

A. sawtell, of Boston, passenger, at sea, at 11 P. M., November 29, leaving a wife and six children at Boston; buried at San Diego.

In San Francisco, on 4th Dec., of crysipelas, Capt. John Emerson, of Bradford, Mass., aged 28 years.

In San Francisco, on the morning of the 4th Dec., after a lingering illness, Margaret Peddett, in the 33d year of her age.

a lingering illness, Margaret Peddett, in the 23d year of her age.

In Sap Francisco, 2d Dec. after an illness of four days, Wm. R. Peeples, 2ged about 28 years, late of Brownsville, Tennessee.

1; influenza 1; unascertained 2. Total 27.

Review of the Market.

San Francisco, Dec. 4, 1851

The heavy arrivals of goods since our raview of Nov. 15, have still further depressed our market. In most of the staple articles the market is glutted, and in quite a number a full year's supply is on hand. With such a state of things, remmenative prices can never rule; and until these over supplies from the East cease, our market can never procesus a healthy appearance.

The Ean Francisco Money Market.—The day has teen unfavorable for business, owing to the rath and the cellvery of the mail, and we have no change to notice in prices. There is a feeling among holders of goods, of comiderable firmness, on ascount of the fact that but small shipments are expected, and the certainty of a very large emigration from the Atlatic States. A quantity of City Bonds were offered at auction but we judge from appearances that they were bought in as they could be easily bought at private sale at less price. All stocks have a downward tendency, and City Bonds in particular, owing partly to a large amount about being issued in settlement of street contracts, although recent purchasers are anxious to keep them up. State 3 per cent Bonds, 10 per cent less principal and interest; Sate 7 per cent Bonds, 50 a 60; State 12 per cent Bonds 53 a 64; State Fundable Warrants, 51 a 55; State Unfundable Warrants, 55 a 59; State Omptreller Warrants, 55 a 59; County Scrip, 28 a 56; do, since first of July, 1851, 85 a 80.

City Intelligence.

THE New JUDGES.—The Hon. James J. Roosevelt was sworn in as one of the justless of the Supreme Court, in the place of the Hon. Judge King, where term of office expired on the lat inst. The Hon. Juseph S. Bosworth was sworn in as one of the justless of the Superior Court, vice the Hon. Judge Mason, whose term of office expired on the lat inst. Chief Justice Oakley, having been re-elected to the Superior Court, will also be sword in at the termination of the present term, which has been extended for the purpose of finishing the Forrest Divorce case.

extended for the purpose of finishing the Forrest Divorce case.

A CANKLLIA CONMENTATORY.—There was gathered from a single greenhouse, on Long Island, near this city, on the 23st uit, seven hundred clamelia Japonicas, six hundred of which were the double white. A similar number may be gathered during the present week. Pravious to the late cutting, the conservatory was not unlike an orchard in bloom, being a mass of money white. One of the trees is above fifty years old, and cost fifty guineas.

RESIGNATION OF THE PROPERIONAL BUSINESSES OF NEW YORK.—Rev. Dr. Creighton has resigned the provisional episcopate of the Protestant Episcopal Church in the dicesse of New York to which he was elected at the last diocesan convention. The convention will not meet again till the 29th of September next.

BAD ACCIPIAT.—While two children of Dr. Brandeeth were pisying near the race-way of a stream which turns a mill near their father's residence, a large body of loc, which had become partially detached by the recent thaw, by a stroke from one of the boys, suddenly gave way, and fell with a crushing force upon the younger of the two, inflicting severe internal injuries, which required in his death on Thureday last. He was in the eighth year of his sgr.

cinity.

Never, perhaps, was there more visiting in this city than on Thursday. The day was beautifully fine, and the streets were througed from morning till night-aye, and till "the witching time of night"-by persons making

sad prospect for the morrow. The rain fell in torrents, and the city was enveloped in a thick feg-so much so that it was extremely difficult to cross the ferries, a sin-

gle trip sometimes occupying an hour. Between 11 and 12 o'clock o'clock the rain cleared off, the for was dissipated, and the moon shone out from a serene sky, all betokening the return of fair weather for New Year's day. Shortly after, the merry chimes of the church bells, and the rattle of fire arms all over the city,

serene sky, all betokening the return of fair weather for New Year's day. Shortly after, the merry chimes of the church bells, and the rattle of fire arms all over the city, welcomed in the New Year. The discharge of muskets, and fowling pieces, and platois, was kept up all night, which, with numerous bands of sevenaders promenading the streets, gave but little rest to the inhabitants. Many by way of "taking time by the forelock," set up all night toasting the new year, and by the dawn of day they might be seen reeling through the streets.

Nearly all the shops in the city were closed, and they day were the appearance of a universal holiday.

Many a lady who had made preparations for the reception of viesters, and had spent an anxious day and night on account of the unfavorable state of the weather, was sarily at the windows of her bed room, to see the aspect of the morning, and her delight and agreeable surprise may be imagined on finding that all looks, bright and fair. Breakfast quickly over the matrons and their danghters, dressed in their gayest attire, completed any additional preparations required for the coming events of the day to which they looked forward so long and sheir window shades were all thrown comming their friends.

Europeans, or persons living at a distance from New York, can have no idea of the imperiance attached to the cried of their friends.

Europeans, or persons living at a distance from New York, can have no idea of the imperiance attached to the cried of the idea of the imperiance attached to the cried of the idea of the imperiance attached to the cried of the body of the year, next to the Fourth of July, and in americance of the year next to the Fourth of July, and in americance of the year, next to the Fourth of July, and in americance of the year, next to the Fourth of July, and in americance of the year, next to the Fourth of July, and in americance of the year, next to the fourth of their friends.

Europeans, or persons have an analysis of the first have a decided the persons h

the hence and glory, and the lady who can count most cards next day, housts the greatest number of trophics. Many marriages arise out of this custom, both ladies and gentlemen putting on their most killing looks on this happy day.

On Now Year's day it is gentlemen alone who visit, it being unfarhiomable for a hady to be seen even out on that day. The ceremony is commenced by some visiters coverily as eight o'clock in the morning, and those who have long lists can hardly get through up to 10 elook at night, which is the understood limit in point of time in New York; but it is extended to 12 o'clock in Brooklyn, being the latest possible moment, for after that commences the second of January.

Accordingly, from an early hour on Thursday, thousants, of all classes and degrees, might be seen making calls—some on feet, some in carriages, some in wagene, and some in buggles, but none in sleights, for the absence of snow took away the latter attraction from the day, while, at the same time, it had the good effect of diminishing the number of accidents that invariably occur towards evening, when the occupants of sleighs have taken, perhaps, their fiftieth drink with their friends; As many as ten persons might be seen going together into one house; and it is notsrious that numbers merely visitifom curiosity to see what kind of furniture their into the house, and it is notsrious that numbers merely visitifom curiosity to see what kind of furniture their in the house have, or how beautiful and accomplished are their wives, or daughters, or sisters. At the corner of some street you would often see a single gentleman or a group, looking over a long list of names, covering perhaps, an entire sheet of letter paper.

The day hing so favorable for waiking, numerous calls were made, and by twilight the numbers who were absolutely drunk could hardly be counted. This result was countributed to in no right degree by very many of thos in the liquor buriners keeping open house for their customers, and giving them grauitous drinks du

lowing, that Jam. lat, 1852, was not an exception to the general rule:—

INCIDENTS, FATAL ACCIDENTS, AND RIOTING.
On New Year's eve, after the clearing up of the storm, a number of young men and boys congregated in various parts of the city, as customary on such eccasions, with file and drum, and other instruments suitable for a discord, and paraded through the principal streets. The police were out in strong force, and made several arrests. A party of these rowdy boys made an attack on Mr. Paime's raison, corner of White street and Broadway, breaking the glass, accompanied with other damages. Three of the rowdies were arrested by the police, who gave their names. John Buckley, John Rogers, and Michael Murphy. They were taken before Justice Osborn, who committed them to answer the charge.

On New Year's day, a number of persons were shooting at chickers in avenue C, near Tweifth at, when a loaded gen in the hands of one of the men accidentally want off the contents of which passed through the left thigh of a man named Owen M-Donnell, a shoe maker by trade, who resided at No 311 Eighth street; the charge of powder and shot, from the close position of the gua biew a hole completely through the thigh fracturing the bone into small fragments. The injured man was picked up by his friends, and conveyed to the City Hospital, but expired on arriving at that establishment. An inquest will be held on the body at the hospital. The deceased has left a wife and one child to mourn his loss.

NEW YEARS' DAY IN BROOKLYN.

The first day of the new year was generally observed by the Brooklynites in excordance with ancient usage, and calls upon friends and acquaintances appeared to have been as numerously indulged in as formerly. The Mayor received his friends at the City Hall, between the hours of 11 and 1 o'clock—the sheriff spread as umptaous table at the jail—and nearly all the members of the Oreporation and other prominent individuals had provided pleutinily for the occasion, and hardly one of them could complain of a lack of visitors, or first of the year friends. The residences of some few of the most popular were througed from early forenoon to evening—teeping up a continual geing in and coming out, and notwithstanding that intoxicating frinks were by no means a searcity, it was generally closerved that there was less drunkenness and disorderly conduct than churaterized previous cocasions of a similar nature. Upon the whole, New Year's day in Brooklyn passed off quietly and decentify; and, so far as ascertained, there were very few occurrences which required an exercise of authority on the part of the police.

A number of rictous fellows made an attack on the oyster salton of George T. Downing, No. 3 Broad street, it seems that a precencerted plan existed to create a breach of the peace at the above named place. The police succeeded in taking into custody four of the alleged ringleaders, whose names are Robert Lee, Lawrence Dempsey, Henry Sherman and Control Bennett. They were conveyed before Justice Osborn who, on the evidence adduced, held them to bail in the sum of \$100 cach, to answer the charge of rict preferred against them.

Another disturbance occurred among the occupants of several shantees in Twenty ninth street, between second and Ibird avenues. Captain Whigam, of the Eighteenth word, with his men, while endeavoring to quilt the rict, received injury to his person and clothing. Utilinately they succeeded in capturing Owen Conckiin, Michael Conckiin, and Danfel Sweeney; also, two men c

The Day after New_Year's.

Yesterday the ladies were equally favored with a charming day for returning the gentlemen's visits of the day previous. The visits of the fair were accordingly numerous.
